

GENIUS

A genius
in philosophy
is sometimes one who
merely points out the
extremely obvious,
yet easily forgotten.

Even Plato thought
it was all a matter of
recollection.

The genius is,
in a way,
naïve—
someone who, with fresh eyes,
aimlessly wanders
onto a well-traveled road.

The genius is,
in all ways,
a reawakened child
in the body of
an elder.
